

Quiz 1 Calculus 3 8/28/2007

Each problem is worth 5 points. Clear and complete justification is required for full credit.

1. Suppose $\mathbf{a} = 3\mathbf{i} - 4\mathbf{k}$ and $\mathbf{b} = 5\mathbf{i} - \mathbf{j} + 2\mathbf{k}$. Find $\mathbf{a} + \mathbf{b}$ and $\mathbf{a} - \mathbf{b}$.

2. Find a unit vector in the direction of $\mathbf{v} = \langle 6, -3, 2 \rangle$.
