

Several of these problems will be graded, with each graded problem worth 5 points. Clear, complete, and legible justification is required for full credit. You are welcome to discuss these problems with anyone and everyone, but must write up your own final submission without reference to any sources other than the textbook and instructor.

1. Prove Lemma 6.1.3.
2. Prove that  $U(\mathcal{Q}, f) \leq U(\mathcal{P}, f)$  in Lemma 6.1.5.
3. Do Exercise 6.1.3.
4. Do Exercise 6.1.4.
5. Do Exercise 6.1.6.
6. Do Exercise 6.1.10.
