Deliverables – Weight:

Data – Weight:

Analysis – Weight:

Summary –

6 – Outstanding – This work is beyond what should be expected from a team of undergraduates. I want to show it off to my colleagues, and think it should go far in gaining you employment or admission to suitable graduate programs.

5 – Excellent – This work is the best that should be expected from a team of undergraduates. There are numerous strengths I would use to show other students what they should work towards.

4 – Good – There are no serious problems with the work, but may be areas where additional development would clearly improve it.

3 – Passable – This was not an area of particular strength, but the limitations do not impede the rest of the work.

2 – Flawed – There are errors, omissions, or significant limitations to this aspect of the project.

1 – Deeply Flawed – Well, at least you turned something in.
