Quiz 5          Calculus 1          7/19/2005

Each problem is worth 5 points. Clear and complete justification is required for full credit.

1. Find the maximum value of the function \( f(x) = -x^2 + 5x - 7 \).

2. Find the exact coordinates of the inflection point of the function \( g(x) = x^3 + 2x^2 - 1 \).
1. Find the maximum value of the function $f(x) = -x^2 + 5x - 7$.

2. Find the exact coordinates of the inflection point of the function $g(x) = x^3 + 2x^2 - 1$.
