Office: Hickok 206A
Office Hours: MTWF 3:00-3:50pm and by appointment
Office Phone: 399-8280
Home Phone: 841-5111 (between 7am and 10pm)
Text: $\quad$ Calculus, Single and Multivariable, $3^{\text {rd }}$ Edition, Hughes-Hallett et al.
Problem Sets There will be several problem sets and quizzes during the semester. Together these \& Quizzes: will be worth 200 points ( $25 \%$ of the final grade)

Exams: There will be four in-class exams administered during class time. The dates of these are indicated in the schedule on the back side of this sheet. These exams will be worth 100 points ( $12.5 \%$ of the final grade) each.

The final exam will be held during finals week at the date and time indicated on the back side of this sheet. The final will be worth 200 points ( $25 \%$ of the final grade).

Grading: $\quad$ Grading will approximately follow a $90 \% \mathrm{~A}, 80 \% \mathrm{~B}, 70 \% \mathrm{C}, 60 \% \mathrm{D}$ scale.
Makeups: Makeups for exams will generally be allowed only under extenuating circumstances, with documentation and advance notice when humanly possible. Late problem sets and quizzes will generally not be accepted, and if accepted due to extenuating circumstances will generally be subject to a penalty of $20 \%$ of the possible points for each day past due.

Calculus 2 is a continuation of topics introduced in Calculus 1, but with a greater depth and sophistication. The problems get bigger, and the ideas get bigger as well. Some truly interesting questions become answerable, and more aspects of the world come within reach, but the techniques involved become substantially more difficult.

To enter this class, each student must pass (with a score of $80 \%$ or more) a computer-administered multiple-choice "gateway" exam. You are allowed to attempt this exam as many times as desired, provided that you demonstrate understanding of previous mistakes before beginning a retake. After the third week grades will be lowered by $10 \%$ for each week or portion of a week without passing this exam.

The use of technology, particularly the software package Maple, will be an important component of the course, and most Tuesday meetings will be "Lab" sessions spent on the computers. Ability to compute with pencil and paper will also be important, as will conceptual understanding of the topics treated.

This combination of approaches and topics is likely to prove challenging, partly because few people will find that all of these aspects play to personal strengths. Don't let that be overwhelming, though, and remember that I'm around to help.

Tentative Schedule

| Monday August $23^{\text {rd }}$ §6.1 \& 2 Antiderivatives | Tuesday August $24^{\text {th }}$ <br> Lab: Introducing Maple | Wednesday August $25^{\text {th }}$ §6.4 \& §6.5 Motion | Friday August $27^{\text {th }}$ §7.1 $u$-Substitution |
| :---: | :---: | :---: | :---: |
| Monday August 30 ${ }^{\text {th }}$ §7.2 Integration by Parts | Tuesday August $31^{\text {st }}$ <br> Lab: Computer Integration | Wednesday September $1^{\text {st }}$ §7.3 Tables of Integrals | Friday September $3^{\text {rd }}$ §7.4 Trig Substitution |
| Monday September $6^{\text {th }}$ <br> No classes - Labor Day | Tuesday September $7^{\text {th }}$ <br> Lab: Approximations | Wednesday September $8^{\text {th }}$ Review | Friday September $10^{\text {th }}$ <br> Exam 1 |
| Monday September $13^{\text {th }}$ §7.7 Improper Integrals | Tuesday September $14^{\text {th }}$ <br> Lab: §7.8 Comparison | Wednesday September $15^{\text {th }}$ §8.1 Area and Volume | Friday September $17^{\text {th }}$ §8.2 Volume and Length |
| Monday September $20^{\text {th }}$ <br> §8.3 Center of Mass | Tuesday September $21^{\text {st }}$ Lab: Slicing | Wednesday September $22^{\text {nd }}$ §8.4 App. To Physics | Friday September $24^{\text {th }}$ $\S 8.5$ App. To Econ. |
| Monday September $27^{\text {th }}$ §8.6 Probability | Tuesday September $28^{\text {th }}$ Lab: Probability | Wednesday September 29 ${ }^{\text {th }}$ Review | Friday October $1^{\text {st }}$ Exam 2 |
| Monday October $4^{\text {th }}$ §9.1 Geometric Series | Tuesday October $5^{\text {th }}$ <br> Lab: Sequences \& Series | Wednesday October $6^{\text {th }}$ §9.2 Convergence | Friday October $8^{\text {th }}$ <br> §9.3 Convergence Tests |
| Monday October $11^{\text {th }}$ <br> No class - Fall Break | Tuesday October $12^{\text {th }}$ <br> No class - Fall Break | Wednesday October $13^{\text {th }}$ §9.3 Convergence Tests | Friday October $15^{\text {th }}$ §9.3 Convergence Tests |
| Monday October $18^{\text {th }}$ §9.4 Power Series | Tuesday October $19^{\text {th }}$ <br> Lab: Conv. Graphically | Wednesday October $20^{\text {th }}$ §10.1 Taylor Polynomials | Friday October $22^{\text {nd }}$ §10.2 Taylor Series |
| Monday October $25^{\text {th }}$ §10.2 Taylor Series | Tuesday October $26^{\text {th }}$ Lab: Polynomial Approx. | Wednesday October $27^{\text {th }}$ §10.3 Finding Taylor Ser. | Friday October $29^{\text {th }}$ §10.3 Using Taylor Series |
| Monday November $1^{\text {st }}$ <br> §10.5 Fourier Series | Tuesday November $2^{\text {nd }}$ <br> Lab: Fourier Series | Wednesday November $3^{\text {rd }}$ Review | Friday November $5^{\text {th }}$ <br> Exam 3 |
| Monday November $8^{\text {th }}$ §11.1 Diff. Eq. | Tuesday November $9^{\text {th }}$ <br> Lab: Slope Fields | Wednesday November $10^{\text {th }}$ §11.2 Slope Fields | Friday November $12^{\text {th }}$ <br> §11.3 Euler's Method |
| Monday November $15^{\text {th }}$ §11.4 Sep. of Variables | Tuesday November $16^{\text {th }}$ Lab: Exponential Growth | Wednesday November $17^{\text {th }}$ §11.5 Growth and Decay | Friday November $19^{\text {th }}$ §11.6 Modeling |
| Monday November $22^{\text {nd }}$ §11.7 Population Growth | Tuesday November $23^{\text {rd }}$ <br> Lab: Logistic Growth | Wednesday November $24^{\text {th }}$ <br> No class - Thanksgiving | Friday November $26^{\text {th }}$ <br> No class - Thanksgiving |
| Monday November 29 ${ }^{\text {th }}$ §11.8 Systems | Tuesday November $30^{\text {th }}$ <br> Lab: The Phase Plane | Wednesday December $1^{\text {st }}$ Review | Friday December $3^{\text {rd }}$ Exam 4 |
| Monday December $6^{\text {th }}$ Appendix B Polar Coord. | Tuesday December $7^{\text {th }}$ Review | Wednesday December $8^{\text {th }}$ Review |  |
| Wednesday December $15^{\text {th }}-1 \mathrm{pm}$ - Final Exam |  |  |  |

Any students with disabilities which might affect their performance in this class should contact me as soon as possible to arrange accommodations.

The faculty has adopted a policy on academic integrity. It is your responsibility to understand and follow it.
Diversity, in all its forms, is valuable.
