Instructor: Jonathan White
E-Mail: JWhite@Coe.Edu
Web Page: http://www.coe.edu/~jwhite/
Office: Hickok 206A
Office Hours: MTWF 3:00-3:50pm and by appointment
Office Phone: 399-8280
Home Phone: $\quad 841-5111$ (between 7 am and 10pm)
Text: $\quad$ Calculus, Single and Multivariable, $3^{\text {rd }}$ Edition, Hughes-Hallett et al.
Problem Sets Assorted Problem Sets will be given throughout the term to supplement class work.
\& Quizzes: Many of these will benefit from the use of the software package Maple, which is available on the computers in the labs throughout campus. Quizzes will also be given frequently. Combined these will be worth 200 points ( $2 / 7$ of the final grade).

Exams: There will be three in-class exams administered during class time. The dates of these are indicated in the schedule on the back side of this sheet. These exams will be worth 100 points ( $1 / 7$ of the final grade) each.

The final exam will be held during finals week at the date and time indicated on the back side of this sheet. The final will be worth 200 points ( $2 / 7$ of the final grade).

Grading: Grading will approximately follow a $90 \% \mathrm{~A}, 80 \% \mathrm{~B}, 70 \% \mathrm{C}, 60 \% \mathrm{D}$ scale.
Makeups: $\quad$ Makeups for exams will generally be allowed only under extenuating circumstances, with documentation and advance notice when humanly possible. Late problem sets and quizzes will generally not be accepted, and if accepted due to extenuating circumstances will generally be subject to a penalty of $20 \%$ of the possible points for each day past due.

Calculus 3 is the culmination of the calculus sequence, and this presents challenges in at least three respects. First, ability to visualize and use spatial intuition is taken to a new level. Second, computations are in some cases correspondingly bigger and longer. Third, abstract theoretical considerations become a more central element, sometimes overshadowing mere computations as the most important material.

In response to all three of these considerations the judicious use of technology can be a valuable aid. Sophisticated calculators such as the TI-89 and computer software packages such as Maple, when used properly, can lead to easier and deeper understanding of the course material. However the use of this technology itself involves a significant learning experience, and often significant frustrations. We will attempt to use Maple in this course when the benefits are the greatest, and assist you in its use enough to keep the frustrations to a minimum.

If at some point these challenges or frustrations get too bad, I strongly encourage you to see me for extra explanation -- don't wait until you're overwhelmed. I'm here to help.

Tentative Schedule

| $\begin{gathered} \text { Monday August } 23^{\text {rd }} \\ \S 12.1 \mathrm{f}: \mathbb{R}^{2} \rightarrow \mathbb{R} \end{gathered}$ | Tuesday August $24^{\text {th }}$ <br> Lab: §12.2 \& 12.3 Graphs | Wednesday August $25^{\text {th }}$ $\S 12.4$ Linear Functions | Friday August $27^{\text {th }}$ <br> $\S 12.5 \mathrm{f}: \mathbb{R}^{3} \rightarrow \mathbb{R}$ |
| :---: | :---: | :---: | :---: |
| Monday August 30 ${ }^{\text {th }}$ §13.1 \& § 13.2 Vectors | Tuesday August 31 ${ }^{\text {st }}$ <br> Lab: §12.6 Limits | Wednesday September $1^{\text {st }}$ §13.3 Dot Products | Friday September $3^{\text {rd }}$ §13.4 Cross Products |
| Monday September $6^{\text {th }}$ <br> No classes - Labor Day | Tuesday September $7^{\text {th }}$ Lab: Slopes | Wednesday September $8^{\text {th }}$ §14.1 \& §14.2 Partial Derivatives | Friday September $10^{\text {th }}$ §14.3 Local Linearity |
| Monday September $13^{\text {th }}$ $\S$ 14.4 Gradients and $f_{u}$ in $\mathbb{R}^{2}$ | Tuesday September $14^{\text {th }}$ Lab: Gradients | Wednesday September $15^{\text {th }}$ $\S 14.5$ Gradients and $f_{u}$ in $\mathbb{R}^{3}$ | Friday September $17^{\text {th }}$ §14.6 The Chain Rule |
| Monday September $20^{\text {th }}$ $\S 14.72^{\text {nd }}$-order Partials | Tuesday September $21^{\text {st }}$ <br> Lab: §14.8 Differentiability | Wednesday September $22^{\text {nd }}$ Review | Friday September $24^{\text {th }}$ <br> Exam 1 |
| Monday September $27^{\text {th }}$ §15.1 Local Extrema | Tuesday September $28^{\text {th }}$ Lab: Optimization | Wednesday September $29^{\text {th }}$ §15.2 Optimization | Friday October ${ }^{\text {st }}$ §15.3 Constrained Opt. |
| Monday October $4^{\text {th }}$ §16.1 Definite Integrals | Tuesday October $5^{\text {th }}$ <br> Lab: Riemann Sums | Wednesday October $6^{\text {th }}$ §16.2 Iterated Integrals | Friday October $8^{\text {th }}$ §16.3 Triple Integrals |
| Monday October $11^{\text {th }}$ <br> No class - Fall Break | Tuesday October $12^{\text {th }}$ <br> No class - Fall Break | Wednesday October $13^{\text {th }}$ §16.3 Triple Integrals | Friday October $15^{\text {th }}$ App. B: Polar Coordinates |
| Monday October $18^{\text {th }}$ §16.4 Int. in Polar Coord. | Tuesday October $19^{\text {th }}$ <br> Lab: Integration | Wednesday October $20^{\text {th }}$ §16.5 Int. in Sph. and Cyl. | Friday October $22^{\text {nd }}$ §16.6 Applications to Prob. |
| Monday October $25^{\text {th }}$ §16.7 Change of Variables | Tuesday October $26^{\text {th }}$ <br> Lab: Monte Carlo Methods | Wednesday October 27 ${ }^{\text {th }}$ Review | Friday October $29^{\text {th }}$ Exam 2 |
| Monday November $1^{\text {st }}$ §17.1\&2 Parametric Curves | Tuesday November $2^{\text {nd }}$ Lab: §17.3 Vector Fields | Wednesday November $3^{\text {rd }}$ §17.4 Flow | Friday November $5^{\text {th }}$ §18.1 Line Integrals |
| Monday November $8^{\text {th }}$ §18.2 Line Integrals | Tuesday November $9^{\text {th }}$ <br> Lab: §18.3 Path Independence | Wednesday November $10^{\text {th }}$ §18.4 Green's Theorem | Friday November $12^{\text {th }}$ § 17.5 \& §19.1 Flux Integrals |
| Monday November $15^{\text {th }}$ §19.2 Tidy Flux Integrals | Tuesday November $16^{\text {th }}$ <br> L ab: §20.1 Divergence | Wednesday November $17^{\text {th }}$ §19.3 Less Tidy Flux Integrals | Friday November $19^{\text {th }}$ §20.2 The Div. Theorem |
| $\begin{gathered} \text { Monday November } 22^{\text {nd }} \\ \S 20.3 \text { Curl } \end{gathered}$ | Tuesday November $23^{\text {rd }}$ <br> Lab: Divergence and Curl | Wednesday November $24^{\text {th }}$ <br> No class - Thanksgiving | Friday November $26^{\text {th }}$ <br> No class - Thanksgiving |
| Monday November $29^{\text {th }}$ §20.4 Stokes' Theorem | Tuesday November $30^{\text {th }}$ <br> Lab: §20.5 The Fun. Theorems | Wednesday December $1^{\text {st }}$ Review | Friday December $3{ }^{\text {rd }}$ Exam 3 |
| Monday December $6^{\text {th }}$ App. C: Complex Numbers | Tuesday December $7^{\text {th }}$ App. C: Complex Numbers | Wednesday December $8^{\text {th }}$ Review |  |
| Tuesday December $14^{\text {th }}-1$ pm - Final Exam |  |  |  |

Any students with disabilities which might affect their performance in this class should contact me as soon as possible to arrange accommodations.

The faculty has adopted a policy on academic integrity. It is your responsibility to understand and follow it.
Diversity, in all its forms, is valuable.
