| Text: | Calculus, Early Transcendentals, $G^{\text {th }}$ Edition, James Stewart |

Problem Sets, There will be several problem sets and quizzes during the semester, as well as online WeBWorK Quizzes \& WW: assignments. Together these will be worth 200 points

Math Culture Math Culture Points will constitute 50 points. These will be earned through participation in various Points: activities outside of class, as detailed elsewhere.

Exams: There will be three in-class exams administered during class time. The dates of these are indicated in the schedule on the back side of this sheet. These exams will be worth 100 points each. The final exam will be held during finals week at the date and time indicated on the back side of this sheet. The final will be worth 200 points.
Grading: Grading will approximately follow a $90 \% \mathrm{~A}, 80 \% \mathrm{~B}, 70 \% \mathrm{C}, 60 \% \mathrm{D}$ scale. Current grade information will be available online through Moodle at all times.

Makeups: For the sake of fairness to those who follow the schedule, makeups for exams will be allowed only under extenuating circumstances, with documentation and advance notice when humanly possible. Late problem sets and quizzes will generally not be accepted, and if accepted due to extenuating circumstances will generally be subject to a penalty of $20 \%$ of the possible points for each day past due. Late WeBWorK will not be accepted.

Any student entering this class should already be aware that calculus is the mathematics of changing quantities. The major development in Calculus 3 is that we widen our scope to functions of more than one variable. This simultaneously adds tremendously to the breadth of phenomena that can be addressed, and also introduces complications that have no analog in the essentially two-dimensional world of Calculus 1 and 2.

Calculus 3 is the culmination of the calculus sequence, and this presents challenges in at least three respects. First, ability to visualize and use spatial intuition is taken to a new level. Second, computations are in some cases correspondingly bigger and longer. Third, abstract theoretical considerations become a more central element, sometimes overshadowing mere computations as the most important material. In response to all three of these considerations the judicious use of technology can be a valuable aid. Sophisticated calculators such as the TI-89 and computer software packages such as Mathematica, when used well, can lead to easier and deeper understanding of the course material. However the use of this technology itself involves a significant learning experience, and often significant frustrations. We will attempt to use Mathematica in this course when the benefits are the greatest, and assist you in its use enough to keep the frustrations to a minimum.

To enter this class, each student must pass a computer-administered antiderivatives "gateway" exam. You may attempt this exam as often as desired, provided that you demonstrate understanding of previous mistakes before a retake. Success by 5 pm Friday, August $28^{\text {th }}$ will count as 5 points toward a student's WeBWorK score, but after 5pm Friday, September $4^{\text {th }}$ course grades will be lowered by $5 \%$ for each week or portion of a week without passing this exam.

## Calculus 3 MTWF 1:00-1:50pm Fall 2009 Stuart 308

If at some point the challenges or frustrations of this class get too bad, I strongly encourage you to see me for extra explanation - don't wait until you're overwhelmed. I'm here to help.

## Tentative Schedule

| Monday, August $24^{\text {th }}$ $\S 12.1-2 \mathbb{R}^{3}$ and Vectors | Tuesday, August $25^{\text {th }}$ §12.3 Dot Products | Wednesday, August $26^{\text {th }}$ <br> §12.4 Cross Products | Friday, August $28^{\text {th }}$ §12.5 Lines \& Planes |
| :---: | :---: | :---: | :---: |
| Monday, August $31^{\text {st }}$ <br> §12.6 Quadric Surfaces | Tuesday, September $1^{\text {st }}$ §12.6 Quadric Surfaces | $\begin{gathered} \text { Wednesday, September } 2^{\text {nd }} \\ \S 14.1 \mathrm{f}: \mathbb{R}^{\mathrm{n}} \rightarrow \mathbb{R} \end{gathered}$ | Friday, September $4^{\text {th }}$ §14.2 Limits \& Continuity |
| Monday, September $7^{\text {th }}$ <br> No Class - Labor Day | Tuesday, September $8^{\text {th }}$ §14.2 Limits \& Continuity | Wednesday, September $9^{\text {th }}$ §14.3 Partial Derivatives | Friday, September $11^{\text {th }}$ <br> §14.4 Tangent Planes |
| Monday, September $14^{\text {th }}$ §14.5 Chain Rule | Tuesday, September $15^{\text {th }}$ §14.6 Directional Derivatives | Wednesday, September $16^{\text {th }}$ §14.7 Optimization | Friday, September $18^{\text {th }}$ <br> §14.7 Optimization |
| Monday, September $21^{\text {st }}$ §14.8 Constrained Opt. | Tuesday, September $22^{\text {rd }}$ §14.8 Constrained Opt. | Wednesday, September $23^{\text {rd }}$ Review for Exam | Friday, September $25^{\text {th }}$ <br> Exam 1 |
| Monday, September $28^{\text {th }}$ §15.1 Double Integrals | Tuesday, September $29^{\text {th }}$ §15.1 Double Integrals | Wednesday, September $30^{\text {th }}$ §15.2 Iterated Integrals | Friday, October $2^{\text {nd }}$ <br> §15.3 General Double Integrals |
| Monday, October $5^{\text {th }}$ §15.4 Double Int. in Polar | Tuesday, October $6^{\text {th }}$ §15.5 Applications | Wednesday, October $7^{\text {th }}$ §15.5 Applications | Friday, October $9^{\text {th }}$ §15.6 Triple Integrals |
| Monday, October $12^{\text {th }}$ <br> No Class - Fall Break | Tuesday, October $13^{\text {th }}$ <br> No Class - Fall Break | Wednesday, October $14^{\text {th }}$ §15.6 Triple Integrals | Friday, October $16^{\text {th }}$ §15.7 Int. in Cylindrical |
| Monday, October $19^{\text {th }}$ §15.8 Int. in Spherical | Tuesday, October $20^{\text {th }}$ §15.9 The Jacobian | Wednesday, October 21 ${ }^{\text {st }}$ <br> Review for Exam | Friday, October $23^{\text {rd }}$ Exam 2 |
| Monday, October $26^{\text {th }}$ §13.1 Vector Functions | Tuesday, October $27^{\text {th }}$ <br> $\S 13.2 \& \S 13.4 \mathbf{r}^{\prime}(\mathrm{t})$ | Wednesday, October $28^{\text {th }}$ <br> $\S 13.2 \& \S 13.4 \mathbf{r}^{\prime}(\mathrm{t})$ | Friday, October $30^{\text {th }}$ <br> §13.3 Arc Length \& Curvature |
| Monday, November $2^{\text {nd }}$ §16.1 Vector Fields | Tuesday, November $3^{\text {rd }}$ §16.2 Line Integrals | Wednesday, November $4^{\text {th }}$ §16.2 Line Integrals | Friday, November $6{ }^{\text {th }}$ <br> §16.3 Fun. Theorem of Line Int. |
| Monday, November $9^{\text {th }}$ §16.4 Green's Theorem | Tuesday, November $10^{\text {th }}$ §16.5 Curl \& Divergence | Wednesday, November $11^{\text {th }}$ §16.6 Parametric Surfaces | Friday, November $13^{\text {th }}$ §16.7 Surface Integrals |
| Monday, November $16^{\text {th }}$ §16.8 Stokes' Theorem | Tuesday, November $17^{\text {th }}$ §16.8 Stokes' Theorem | Wednesday, November $18^{\text {th }}$ §16.9 Divergence Theorem | Friday, November $20^{\text {th }}$ §16.10 Summary |
| Monday, November $23^{\text {rd }}$ Review for Exam | Tuesday, November $24^{\text {th }}$ Exam 3 | Wednesday, November $25^{\text {th }}$ <br> No Class - Thanksgiving Break | Friday, November $27^{\text {th }}$ <br> No Class - Thanksgiving Break |
| Monday, November $30^{\text {th }}$ Quadratic Approximation | Tuesday, December $1^{\text {st }}$ Euler's Formula | Wednesday, December $2^{\text {nd }}$ Complex Arithmetic | Friday, December $4^{\text {th }}$ Complex Arithmetic |
| Monday, December $7^{\text {th }}$ Review | Tuesday, December $8^{\text {th }}$ Review |  |  |
| Final Exam - 11am on Monday, December 14 ${ }^{\text {th }}$ |  |  |  |

Any students with disabilities which might affect their performance in this class should contact me as soon as possible to arrange accommodations.

The faculty has adopted a policy on academic integrity. It is your responsibility to understand and follow it.

Diversity, in all its forms, is valuable.

## Math Culture Points

A significant portion of the grade for this course will take the form of Math Culture Points. These will be earned through activities outside of class including, but not necessarily limited to, those listed below:

| Activity | Points | Max \# |
| :--- | :---: | :---: |
| Colloquium Attendance | 5 | - |
| Colloquium Presentation | $5-15$ | 2 |
| Meeting Attendance <br> Iowa Section of the Mathematical Association of America (October 9 |  |  |
| Mathematics Competition Participation <br> Iowa Mathematical Modeling Competition (October?) <br> Putnam Competition (December 5th | 15 | 2 |
| Math Culture Reading <br> Some weeks specific readings will be posted on the course web page <br> With approval, any column on MAA.org <br> With approval, an article from Math Horizons, CMJ, etc. | 10 | 5 |
| Math Club Activities (when appropriate) <br> Movies, Speakers, Game Nights, mathematical portion of Playground of Science, etc. | 5 | - |
| Volunteer Math Outreach <br> Working with students at Polk Elementary, etc. | $5-10$ | 5 |
| Other Appropriate Coe Activities (with approval) <br> Psychology Experiment Participation | 5 | 5 |

Generally Math Culture Points can be earned for at most two activities in any given week, so you should plan to spread your participation throughout the semester. In each case above, credit assumes both full participation and posting a brief summary/response on Moodle. These reflections should generally be between 100 and 300 words, and include both a brief summary and your personal thoughts on the event, and must be submitted within one week of the event.
