

# Calculus 1 Take-Home Quiz 1 Due 8/29/22

This is an open-note, open-book, open-neighbor, open-internet quiz. You're strongly encouraged to understand your answers rather than just copy them from someone or someplace. 5 points possible, 1 for each question.

1. Suppose that someone takes a quiz a day late without a good reason. If the quiz was worth 10 points, and they miss half the points, what score goes in the gradebook?
2. Which of the below are stated reasons for the late penalty? Check all that apply:
  - National security
  - Climate change
  - The Provost has mandated it
  - Fairness to those who follow the schedule
  - Godwin's Law of Nazi analogies
3. What is the highest grade you can earn in the class without successfully completing the gateway exam?
4. What is the date of the first exam?
5. Suppose that a student earns a middle B (so 85% of the points possible) on exams, but blows off the WeBWorK and quizzes (so 0% of those points are earned) because they're understandably sick of online learning crap. What will their final grade be? Why does that seem fair or unfair to you?
