- A function $f: \mathbb{R} \rightarrow \mathbb{R}$ is even iff $\forall x \in \mathbb{R}, f(-x)=f(x)$.
- A function $f: \mathbb{R} \rightarrow \mathbb{R}$ is odd iff $\forall x \in \mathbb{R}, f(-x)=-f(x)$.

1. The sum of two even functions is $\qquad$ .
2. The sum of two odd functions is $\qquad$ .
3. The sum of an even function with an odd function is $\qquad$ .
4. The product of two even functions is $\qquad$ .
5. The product of two odd functions is $\qquad$ .
6. The product of an even function with an odd function is $\qquad$ .
7. The composition of two even functions is $\qquad$ .
8. The composition of two odd functions is $\qquad$ .
9. The composition of an even function with an odd function is $\qquad$ .
10. The derivative of an even function is $\qquad$ .
11. The derivative of an odd function is $\qquad$ .

- A function $f: D \rightarrow \mathbb{R}$ is increasing iff $\forall x, y \in D, x>y \Rightarrow f(x)>f(y)$.
- A function $f: D \rightarrow \mathbb{R}$ is decreasing iff $\forall x, y \in D, x>y \Rightarrow f(x)<f(y)$.

12. The sum of two increasing functions is $\qquad$ .
13. The sum of two decreasing functions is $\qquad$ _.
14. The sum of an increasing function with a decreasing function is $\qquad$ .
15. The product of two increasing functions is $\qquad$ .
16. The product of two decreasing functions is $\qquad$ .
17. The product of an increasing function with a decreasing function is $\qquad$ .
18. The composition of two increasing functions is $\qquad$ .
19. The composition of two decreasing functions is $\qquad$ .
20. The composition of an increasing function with a decreasing function is $\qquad$ .
21. The derivative of a decreasing function is $\qquad$ .
22. The derivative of an increasing function is $\qquad$ .
