## Foundations of Advanced Mathematics 1pm MWF Spring 2018 SH309

Instructor:	Jonathan White
E-Mail:	JWhite@Coe.Edu
Web Page:	http://public.coe.edu/ jwhite/
Office:	Stuart 316
Office Hours:	9:30-9:50am and 11:00-11:30am MWF and by appointment
Office Phone:	399-8280
Home Phone:	362-3350 (between 7am and 10pm)
Text:	<i>Foundations of Advanced Mathematics</i> , 0.9th Edition, White (available via Jon's Central Page)
Participation:	Day-to-day class participation, presentations, and snap quizzes will be a prominent aspect of this class, and together worth 200 points.
Problem Sets:	There will be problem sets due most weeks of the semester. Together these will be worth 200 points.
Math Culture:	Math Culture Points will constitute 200 points. These are earned through various activities outside of class, as detailed on page 3 of this syllabus.
Exams:	There will be four small in-class examlets administered during class time. The dates of these are indicated in the schedule on the back side of this sheet. These examlets will be worth 50 points each.
	The final exam will be held during finals week at the date and time indicated on the back side of this sheet. The final will be worth 200 points.
Grading:	Grading will approximately follow a $[92.0\%, +\infty) \rightarrow A$ , $[90\%, 92\%) \rightarrow A$ -, $[87\%, 90\%) \rightarrow B$ +, $[82\%, 87\%) \rightarrow B$ , $[80\%, 82\%) \rightarrow B$ -, $[77\%, 80\%) \rightarrow C$ +, $[72\%, 77\%) \rightarrow C$ , $[70\%, 72\%) \rightarrow C$ -, $[67\%, 70\%) \rightarrow D$ +, $[62\%, 67\%) \rightarrow D$ , $[60\%, 62\%) \rightarrow D$ -, $(-\infty, 60\%) \rightarrow F$ scale.
Makeups:	For fairness to those who follow the schedule, makeups for exams will be allowed only in extenuating circumstances, with documentation and advance notice when humanly possible. Late problem sets will be penalized 20% of points possible for each day late, and only accepted until others are returned.

This class is intended to achieve several goals, but primary among them is to give some accurate idea of what mathematics actually is. The specific content of the course is secondary, but my hope is to give a good exposure to many topics which are helpful or necessary to further study in mathematics and related fields. These include, but are not limited to, the basics of number theory, set theory, functions, logic, and combinatorics.

This course will be profoundly different, both in subject matter and in daily conduct, than what most of you are accustomed to in a math class. Please understand that it's different on purpose, with very clear reasons in mind. It is extremely important that you come to class each day prepared to do several of the upcoming problems. You will probably have to find different ways to learn things in this class than in any math class you've taken before. Don't let that be overwhelming, and remember that I'm around to help.

"Doubt everything at least once, even the proposition that two times two equals four." –Georg Christoph Lichtenberg (1742-1799)

1/8	1/10	1/12				
Parity	Beyond Parity	Divisibility				
		2				
1/15	1/17	1/19				
No Class – MLK Day	Modular Arithmetic	Basic Logic				
1 /22	1/24	1/07				
1/22	1/24	1/26				
Quantification	Proof Techniques: Contradiction	Proof Techniques: Induction				
1/29	1/31	2/2				
Proof Techniques: Cases	Additional Proof Techniques	Examlet 1				
	Additional 11001 rechniques	Examilet 1				
2/5	2/7	2/9				
Sets	Operations on Sets	Arbitrary $\bigcup$ and $\bigcap$				
	A	, , , , , , , , , , , , , , , , , , , ,				
2/12	2/14	2/16				
Inequalities	Real Intervals	Absolute Values				
2/10	0/01	0/00				
2/19	2/21	2/23				
Cartesian Products	Russell's Paradox	Examlet 3				
2/26	2/28	3/2				
Functions	Operations on Functions	Composition				
	No Class – Spring Break					
3/12	3/14	3/16				
Injectivity & Surjectivity	Inverses	Countability				
3/19	3/21	3/23				
Uncountability	The Continuum Hypothesis	Examlet 3				
2/26	3/28	3/30				
3/26	Properties of Relations	Equivalence Relations				
Relations	rioperties of Relations	Equivalence Relations				
4/2	4/4	4/6				
Relations as Sets	Relations as Graphs	Graphs				
		1				
4/9	4/11	4/13				
Graphs	Directed Graphs	Examlet 4				
	4/10					
4/16	4/18	4/20				
Combinatorics	Probability	The Peano Axioms				
4/23	4/25					
The Peano Axioms	The Peano Axioms					
	Final Exam – 2pm Friday 4/27					

## FOUNDATIONS OF ADVANCED MATHEMATICS 1PM MWF SPRING 2018 SH309 Tentative Schedule

Any students with disabilities which might affect their performance in this class should contact me as soon as possible to arrange accommodations.

Coe's faculty has adopted an academic integrity policy. It is your responsibility to understand and follow it.

Diversity, in all its forms, is valuable.

## FOUNDATIONS OF ADVANCED MATHEMATICS 1PM MWF Spring 2018 SH309 Math Culture Points

A portion of the grade for this course will take the form of Math Culture Points. These will be earned through activities outside of class including, but not necessarily limited to, those listed below. Note that none of these are mandatory – there are far more opportunities than necessary to earn full credit. You should be able to select activities that are particularly relevant to you.

Activity	Points	Max #
Colloquium Attendance		
Colloquium Presentation		2
Meeting Attendance		2
Midwest Undergraduate Mathematics Symposium (4/6-7)		
Nebraska Conference for Undergraduate Women in Mathematics (1/26-28)		
SIGCSE Technical Symposium (?)	30	
Univrsity of Iowa Computing Conference (?)	30	
Hack-a-thon (?)	30	
Math Culture Reading		
Some weeks specific readings will be posted on Moodle	10	-
Articles from Math Horizons		5
With approval, articles from Math. Magazine, The College Math. Journal, etc.		3
Math Club Activities (when appropriate)		5
Winter Break Book Discussion, Movies, Pi Day Celebration, Workshops, etc.		
Other Appropriate Coe or Outreach Activities		
Contemporary Issues Forum (?)		-
Chess Club Meeting		4
Attending a Quantitative Research Symposium Presentation		3
Job Shadowing in any relevant field		1
Working with students at McKinley Middle School, etc. (see Jon)		5

You should plan to spread your participation through the semester. In each case, credit assumes both full participation and posting a brief summary/response on Moodle **in a timely manner**. These reflections should generally be between 100 and 300 words, and include both a brief summary and your personal thoughts on the event, and **must be submitted within one week of the event**, or within the specified time window for other activities. Up to three units of credit may be submitted after normal deadlines in the "Math Culture – Late" category on Moodle, but otherwise exceptions will not be made without serious extenuating circumstances.
